

Knowledge and Skills Management Centre is established as a platform in the adult education system to gear towards linking VET with labor market needs, upgrading people's occupational qualifications, reinforcing their employment perspectives and strengthening social cohesion. The basic objectives and tasks of the Knowledge and Skills Management Centre are connecting the professional education for adults with the needs of the labour market

STRATEGIC GOAL

Knowledge and skills management Centre acts toward **bridging the gap** between labor market need and employment and the need for updated knowledge, skills and qualifications

MARKET RECOGNITION

In order to act as accelerator in raising skills value, K&S centre work on recognition of informal and nonformal learning by the employers that may not easily recognize skills attained this way, so that individuals possessing such uncertified skills are at a disadvantage while finding a job, progressing in their careers or securing a wage increase.

MISSION

To provide educational programs for adults that will enable upgrading of the professional qualifications of business and non-governmental sector users, educational and public institutions, through innovative linking of adult education with the needs of the labor market, prospects for employment and social cohesion, aimed at increasing the competitiveness of the national economy for sustainable growth and development.

TRAINING

Preparation of innovative training schemes and forms for obtaining voluntary qualifications to enable increasing the number of qualified workforce is one of the main missions of the Centre. We enabling different forms of training: classroom, practical classes, on-the-job training, on-line training, elearning, distance learning and offer support of training providers in transposing and accreditation of developed training schemes.

PROMOTING INOVATIVE APPROACH

Knowledge and skills management centre promotes several innovative approaches both in training and obtaining skills and competences, and also in offering new tools and processes.

VISION

To establish a platform in an adult education system that promotes new or upgraded knowledge and skills of qualified workforce, enabling continuous professional development by applying modern and innovative learning tools

PROFESSIONAL DEVELOPMENT

K&S Centre Skopje strongly supports professional development of person in every age and professional profile. The Centre is offering its services as a support for personal development through professional guidance at specially organised dedicated workshops, promotion of Life long learning through the process of Recognition of previous learning, vocational guidance & counseling services.

REPLICATION

The activities of Knowledge and Skills Management Center as a model-to-follow for Balkan countries and wider region will be promoted as leading in this part of EU through number of activities: organisation of workshops, seminars, regional events, international conferences, publication of interviews and popular texts etc
